

## ***NEIL KEENAN UPDATE | Keenan And Group K To The Rescue***

<http://neilkeenan.com/neil-keenan-update-keenan-and-group-k-to-the-rescue/>

AUGUST 25, 2016 | TRANSCRIPT—HEALING MACHINE UPDATE

I received more than one thousand five hundred emails relating to the healing machine. There's nothing anyone can do for at least two weeks because they're leaving to acquire some more assets. When they come back, I'll talk to them about what can be done. But too many emails came from one place, one side, asking for too much.

Considering this is a brand new operation with one clinic; another clinic is going to be in Germany, and another one in Zurich; but not a small one in Zurich, a big one. They're going to be concerned about the big one. And that's where their concern should be, not in our developing something huge in America, United States.

The machines will be made available--some will. Maybe we'll be able to set up a clinic, but it won't be under your own umbrella. You will not have that right. The patent rights all end right where they start--in the hands of the patentees, which happen to be this group that are friends of mine.

I've had some people even come to me telling me this is the same machine they've seen before, and I laugh because six years ago that little box I had, the last time, before previously. That little box was shown throughout Germany because they tried to duplicate what Peter made at that time and they couldn't. They just had to close it up. Peter, the box was superb. What we have now is much better, and not anyone has anything similar. They all say, "Well, gee, we get ours in this place, too." Well, you can get it in that place. You see, I'm not going to tell you exactly how they do it, but not any machine is made in one place. Okay? It comes from three different places. So, you're telling me one thing

and I know three things. So I can just sit back and relax and I can say your machine is a little bit different, or a lot different.

Anyway, so, we will be able to purchase some machines. Just so you know. And, get the line made. As soon as possible I'll try to arrange things for their return. Now, as for giving the contact numbers and emails out, it's not going to happen. They don't work like that now. They have a small clinic and everything works by word of mouth. There's no advertising and they don't have appointments.

When they wake up in the morning and they go into their office, there's three or four hundred people, or two hundred people, out in the street waiting to get into their building. They started with one machine; they have so many machines now. It's a different story. They're very successful. They're moving from that place because it's too small, into the big place in Zurich, which they bought. It's huge. It's a big place. It will handle many people. So, we'll be able to go there. I can arrange that, I believe. And I can also arrange the other place, I believe, if you're in trouble. I can call and I think I can help you. So, you're going to have to stay in touch and we can do that.

The thing is, is that you're not just going to call them and walk in. It doesn't happen like that.

You have to understand something. These machines now will be for sale. Many people won't be able to afford, and that's the reason why everything was supposed to come through, and it will; the collateral accounts. When I open up the collateral accounts and I get those assets and I throw them into the platforms, the money from that will go into the financing, for those, for example, healing machines...healing computers, or even the free energy, which is coming soon, which is even better than before, amongst many other things. Clean water—fresh water out of waste—I mean it's just...the things are going to be fantastic!

So, we're going to be financing that as we said a long time ago. When the notes were stolen, they were stolen because the Vatican was going to turn on the Vatican with new energy that New Year. They were going to turn the lights off at two or three minutes before 12 that night, and they were going to come back on two or three seconds after 12 with new energy. And it would be that way. We'd all be changed right now if that had happened and del Bosco hadn't stolen, you know, so that's that.

There's not much more to talk about there. We're going to have to handle this all. And I've got to take care of my responsibilities, which is the collateral accounts. The machines and healing, and free energy and everything, will fall into place. I can handle that as well. But I'll find somebody that I know that's very close to me to handle that in the very near future, because there's going to be too much work to do for *everybody*.

So, we're going to be getting an update on the video, I believe, that we put up relating to the new machine. The cameraman, he's been working on the other parts to it with showing the screen of the computer as it's working, as it's scanning the body. So you'll see how it works. It will give you an idea.

You can sit back and watch and look and see exactly what's what. I just wanted to make sure you've got an idea now of what this machine looked like, or how it worked, actually. Walter can explain some, I can explain some. I feel great! My ear is perfect. No pain on the way home. My toe...as you saw...my toe is *really* healed. It's crazy! You know? Don't you think? It's crazy. I mean, it's insane and all the other things in my body that's happened to, is good. I feel great.

The machines will be available. We will get them. We will be able to use them—just not as readily as you think. I've got so many people, "I want this. I want that." It's not going to work like that. We have to arrange things. I do. Okay? They've got people from Germany that want them. They've got people from Switzerland that want them. They've got people from Bulgaria that want them. They've got people from everywhere in the world that want them. China wants them. Indonesia wants them. You know, I mean, Malaysia wants them, South Korea--everybody wants them. So, you know, you have got to take it easy. And we've got to do it right. And it's got to come through the collateral accounts. That's what will manufacture those machines. And Walter will have to oversee that and make sure that the programming and so on is not stolen. Things like that, okay? Now if you have any questions, just send them and when I get them all together, I'll send them over to Walter and we'll go from there, okay?
