FEBRUARY 16, 2017 | Transcript

Video One: 'Healing Computer' technology update from February 15

NEIL: Hello I know it's been a long time, maybe a month maybe longer, since I've contacted you please don't think I've been laying in bed or sitting on my ass, that hasn't happened. There's been little time for sleep, there's been so much going on in the world today, including the fact that Donald Trump is stopping the transportation of the gold, the movement of the gold in South Korea and other Asian nations, which is working on behalf of us, or working together, doing the same thing.

So we are getting to where we want to be on that front, which is Asia, which is the collateral account--maybe not even the global collateral accounts, but the collateral accounts which belong to the depositors of the gold, of the assets, but which in turn will help us do everything we want to in our country in regards to humanitarian packages, which includes the new technologies, which I'm running off the wall here.

And you have to hear for yourself about these technologies from people like yourself who have come here to meet us and to work with the machines, to learn the machines. And we are not talking about dunces, we are talking about people who have worked with machines for 30 years that are similar but not anywhere near as good.

Anyway before I go any further, and I'm going to talk to you later about everything happening in Asia, and I have everything, but I've been waiting to finish this up over here because today here in this room we have three beautiful people from

the United States, OK, they are from California and Michigan and they've been working at this for a long time and they really want to help people, and they know how to do it already. And they have to do a little more learning, then they have to come home and they'll be working with you.

We're talking about Beverly Hills CA. Get ready they're coming. And we're talking about Ann Arbor MI, and you know that's a nice little place too! She's coming too and she's a hellfire, so be careful there, she's just too much!

So you are all going to have this (equipment) and they are sitting here and I think rather than me talking about anything more at this point in time, and i mean there's a lot to talk about, but you're going to get that. But I think you should learn about the healing machine and computer from people who know, people like yourself, so that you know exactly where you are.

So, let me introduce you to Angela, Nancy and Ann. They're sitting here and you know something for the first time in my life I'm going to shut up! Is that good or what? You must be smiling? I mean cause you know I don't do that! Haha, I'm Irish what can I tell you!? So now I'm going to bring you the girls and after a couple of days working on the machines, what they've already seen and how they feel about it and what they know about it and they know quite a bit, believe me. So let me shut up. Here are the girls.

ANN: Hello, I'm Ann and I'm going to talk first. I want to say what an honor it is to be here with Neil and the technology and to be learning about this amazing tool for people to use to optimize their immune system. I've been in the holistic healing industry for 30 years, I've worked with a lot of different, I've seen a lot of different technologies, frequency machines, all these things. And when I first got introduced to this, I knew in my gut that this was something very different and very special and I have definitely experienced that in the last couple of days. This is truly incredible. I'm 53 and I've dreamed my whole life about things ... something like this to help people, to reduce the fear around health and their physical condition. And I've experienced it, a couple of treatments, and it really is amazing, you know. So I'm so excited I can barely speak, I mean I'm so excited there's almost no words. We can't wait to bring it home and this is the beginning of something incredible for the human race for sure - so, turn it over to Nancy.

NANCY: Hi, I've been in the healing industry for 40 years, I've been studying and I finally came upon one of the answers. I feel satisfied that I've come upon something that really works and I'm absolutely elated to be here with Mr. Keenan and this grand gentleman who's been so kind to allow us to be in his presence. It's an absolute honor. I can't wait to bring it home to California and work on everybody, I'm just really grateful to be here. Thank you so much.

ANGELA: I'm Angela. I'm totally overwhelmed with excitement and gratitude for Neil and my beautiful family here. We will be bringing this incredible technology and healing..... eh I don't even know what to call it, because it's so ground-

breaking, the machine doesn't even have a name yet. It's so incredible. I will be bringing this technology to Ann Arbor MI first, which will be the first of many places we will be starting in the United States.

The way that this technology works is that it works on the foundation of your body system to it, infuses the body to work at an optimal level so that anything your body would naturally heal on its own, this will optimize your body's natural ability to stimulate your body's own mechanisms of healing. So this is not something that is coming from outside. The medical industry is built on outside mechanisms to treat symptoms, this is actually working on the foundation of your body's systems. I've been in the healing and medical field for the past 20 years, starting with nutrition and going into body work, somatic therapies, emotional healing work. And I realized just a few years ago, actually working on the body itself through somatic therapies, it wasn't going as deep as actually going energetically optimizing the body. So this is frequency healing technology, I'm a sound healer, I've used frequencies with sound and noticed profound shifts in people's health, emotional health, neurological health, as well as the health of all the body systems and the physical body. Working with this machine and technology, I have felt it first hand myself. The incredible vibrations that move through your body and literally build the natural systems of your body to be able to heal themselves. I feel like this is totally the answer. I don't just feel it, I actually know it. I've seen it scientifically, we've treated another patient here. We've received treatments ourselves. We woke up at 4:00 in the morning here in Germany, I had a spinal injury and when I woke up at 4:00 this is the first time in years I woke up without back pain. Just incredible shifts in our energy and you could see it, what's so incredible is you visually, actually see the diagnostics at work. You can see before and after pictures, you can trace your body systems' ability to function and . . .

ANN and NANCY: . . . you can see how it strengthens your energy, you can actually watch yourself getting better! Yeah. And it diagnoses you without any blood, which reduces the stress, which reduces the fear. It's built around healing.

ANGELA: this is futuristic technology that has ancient foundations. It's physics you know! Its absolutely scientific to its core. This is the beginning of a new era for humanity.

NANCY: We don't really know the limits, if it even has any limits. New paradigm.

ANGELA: Right, and there's no side effects except good ones. As a teacher of emotional healing work, what is very exciting to me is that it works on a neurological level to optimize your body's ability to ...balance your emotional wellness.

ANN: . . . balances everything.

ANGELA: So people who have anxiety, depression, addictions, bipolar disorders or just like super anxious and we don't know whywe live in a toxic environment, our brains, our bodies are not designed to handle the foods that we are eating that are subtle poisons, the things that are in the air, if your are watching you know what I mean, and . . .

NANCY: . . . it just bring everything into harmony.

ANGELA: It clears it all. It's like I said, its the answer, its a panacea, its time has come. We are so excited to help you and excited that we have this opportunity to serve so please don't hesitate to find us, give us a call. We are at your service and we love you and we thank you.

ANN: Absolutely, love is the foundation of the whole thing, the heart.

NEIL: May I ask you a question?

ANN: Thank you Neil.

NEIL: How would you compare this to any computer or any device you've worked on in the past ... in regards to healing or health?

ANN: It's not even close, nothing I've seen comes close. This goes way beyond. It's in a whole class by itself. It's like that is old paradigm frequency, this is new paradigm of frequency medicine, that's how I'd describe it.

NANCY: If everyone just has an open mind and they're open to it, just don't put any limitations on it. It's not magic. Its real.

ANN: Yeah, its physics, that's what I was saying yeah.

ANGELA: we call it a miracle and miracles have a scientific way that they work and this is how they happen - laughter - I mean really if you look at the quantum physics behind what we would call a "miracle" this is how it happens. It happens in the frequency field first and then it crystallizes into form, which is how quantum physics and mechanics work. It doesn't compare to anything that I've ever seen, only to something I've dreamt of. It's similar to, it's the power of your heart and your hands, it's something I've only experienced with ... Nancy, who is a very talented and gifted energy healer. And it's similar only to what I've experienced through work that she's done with me. But this is on another level because it's actually verifiable. Yes, it's VERIFIABLE, which is exciting. Because the more you believe something, and the more you see it, the more you believe it, and it strengthens the body's own ability to heal.

NANCY: you know it into being.

NEIL: This is all because of the differences in the frequencies between the...

ANN: It's the amount of frequencies, millions, that this has in comparison to other frequency machines. Certainly hundreds or thousands, versus millions. It's in a whole other category. that's why its so effective, it doesn't miss a beat.

NEIL: It really pushes the immune system.

ANN: It pushes the immune system to operate at a level that we can't get to without the energetic pushing up of the immune system and that's why people get the results that they get.

NEIL: Could you feel that when you were around the machine?

ANN: Oh absolutely, yeah.

NEIL: Could you feel anything with your hands or arms or legs?

ANN: I felt, I could feel in the third part of the treatment I was receiving, I could feel the vibrations and I could really feel the energy coming in.

NANCY: Yes I could feel it also.

ANGELA: Yeah, I felt a lot of pins and needles and you get very euphoric, and for me personally it compares to what I receive after having a massage or doing a couple of hours of yoga, it's a happy thing, it feels good. And you sleep like a baby, angel on a cloud.

ANN: We slept well.

NANCY: Well it balances you out, it brings balance to your life.

ANN: Yes, your mind, body and spirit.

NEIL: Anything else you'd like to say?

NANCY: Well probably a lot.

ANN: I feel so lucky, so inspired. I've listened to Neil since he's been on the internet, and I've just met him now. And for six years I've been following him. And the first post that I ever heard, I was feeling this man was telling the truth and I've followed him for six years, never dreaming that I would be meeting him, let alone working with him. And once he started posting about the healing machine / the computer technology, I had the biggest "Yes" about this and I said I've got to do this, I've got to work with this. I don't know how it's going to happen, but I have to. And literally in two weeks it manifested, which also blew me away, so that was a sign that this is definitely meant to be, so it's very exciting.

ANN: I just want to thank Neil for making all this possible and bringing this to society and we want to be one of his hands or arms that brings it to you.

ANGELA: I think one of the most important things to say is that this is REAL, and it seems unbelievable. I had to really experience it for myself. And there's a lot of "woo woo" stuff that I've been involved with and that I know about as far as frequencies and quantum healing. And like I said, this is real, it works, it works faster and it works more efficiently than anything that I've ever seen or heard about and this is REAL, this is REAL.

NEIL: What is it?

ALL THREE: "IT'S REAL"

NEIL: Well I'm glad you girls came and will continue. You're going to be taking it home, you're going to be creating a storm and doing wonderful things for people.

ANN: Yes thank you, we are going to be spreading it as fast as we can.

NEIL: Keeping people alive and doing what you do. You're going to be great at it. Anything else you'd like say here?

ANN: Whatever we can do to support you.

NEIL: Anything we forgot?

ANGELA: I just want to reiterate if anyone is suffering from any kind of ailment or disease, that you don't have to, you really don't. We just want to be the voice of hope and to give you that gift that you can seek something that can alleviate your suffering, your physical suffering, your emotional suffering.

NANCY: Don't be afraid to try.

ANGELA: Don't be afraid to try because it actually feels good. It takes 20 minutes, it's a short process, and most likely you may need several or just one treatment, but not anything like going through months and months and months of treatments for diseases that are so painful.

NANCY: Your hair isn't going to fall out.

NEIL: Or invasive.

ANGELA: It's not invasive, you come out feeling good, it takes very little time, there's no reason not to try it.

ANN: It's very relaxing.

NANCY: We are waiting for your testimonials too!

ANGELA: Yes please help us to create beautiful stories and give other people hope. And we are waiting to blog as many testimonials as possible. We've already witnessed many testimonials here in Europe, and how it's working. We

are so grateful to be in service to humanity. And when you try it you are in service to humanity by healing yourself, so YOU can serve the world.

NEIL: OK I'd like to say goodnight to everyone and I'd like to thank Nadjib over here who is the magical cameraman behind all this, and you can't see him but you can hear him if you listen (noise in background). Anyway goodnight and you now have the story regarding the healing computer. And the ladies here are all going to go home and they are going to kick ass. They are going to fix you up, make you better, and it's not going to take a needle or take 30, 60 or 90 days. You don't have to wait to get a blood test back. You're going to have a test completed from head to toe in 3 minutes. It's going to tell you everything about your body, tell you everything you need and the rest is all curative. You've got the data there and then you've got the curative part and its only 20 minutes and maybe another 3-7 minutes of talking explaining what this is and what that is. Someone will explain it to you.

You're going to be in good hands. So right now it's time to say goodnight because this is not what I do. This is what the ladies do, they are going to do a great job. I know I'm going to be involved, but they are the ones that are going to be out there, and the ones who know what they are doing.

I'm going to be chasing those accounts and I am going to open them and we are going to have these machines all over the world. So at this point I'm going to say goodnight and you'll have something to talk about and chew on over breakfast. You might even spit up or get scared, who knows, I don't know what's going to happen. But the bottom line is it should be wonderful.

We thank you all for taking the time to listen to this and we are going to be listening to what your responses are on the site in the comment section, and if you want to reach out to any of the girls you can leave a comment there and Richard can get the comments to them OK?

Anyway, I'll say goodnight. And M2 now you hear it, everyone else now you hear it. You're hearing a little bit more, you're hearing about it from people who know about the machines, not Neil Keenan who's only been on them, who can feel the tingles going up his arms and legs and everywhere else too, and it feels pretty good by the way. And I'm saying good night, so enjoy yourselves and get ready for the revolution, there's going to be something coming.

3 LADIES: Woohoo, welcome to the revolution.

NEIL: Bye bye y'all, Drake, Richard, Nadjib, Joe, everyone else, Dean, everyone, this is it. The time has come to really get this thing off the ground. OK no more talk. Goodnight guys, goodnight people and goodnight to you too, bye bye for now. Talk to you soon with the accounts and in that regards I'll be fighting. Ha! I like it better when they fight. Take care all.

3 LADIES: bye
