Complimentary, Traditional And Alternative Cancer Therapies

Note: This document provides information using the same terminology in describing alternative / natural cancer treatments as used by the New Zealand Government: Health New Zealand ([Cancer Treatments](#)) and the Cancer Society of New Zealand ([Complementary, Traditional and Alternative Therapies](#)).

► Introduction

The source of much of the following information is described below.

At the [Consumer Wellness Center data science division](#), we believe that **access to knowledge is a fundamental human right**. And we aim to preserve human knowledge using the best technology available today.

Google, on the other hand, weaponizes its search engine and YouTube platform to squelch human knowledge in an effort to keep everyone functionally illiterate, ignorant and obedience to globalist agendas.

We reject Google's agenda of forced human ignorance. That's why we are building tools and infrastructure that will largely make Google obsolete.

[Brighteon.AI](#) is the distribution hub for a series of upcoming non-commercial, non-profit Large Language Models (LLMs) that aim to **preserve human knowledge** and **empower human beings with that knowledge**, even as Big Tech, Big Government, Big Pharma and other nefarious groups are actively trying to destroy it.

We are building and releasing non-commercial, free-to-use LLMs that are trained on an ever-expanding set of critical human knowledge about food, nutrition, farming, permaculture, herbs, indigenous medicine, alternative medicine, off-grid survival, sustainability and other critical knowledge areas that have kept human civilization alive.

Consider us to be a kind of "Arctic seed bank" of human knowledge that the globalists are trying to eradicate from human history. Brighteon.AI is one answer to coordinated censorship, and it allows users to stop relying on Google, pharma-funded corporate media or nefarious governments to provide you with (distorted) information.

Join [Brighteon.AI](#) efforts to preserve and decentralize human knowledge before it's too late

We are releasing these models free of charge, ready for people to download and use on their own local computers (Windows, Mac, Linux). Since these models run locally, **they work even if the internet is down**.

They require no internet connection. They don't run in the cloud, and they don't surveil your queries. No secretive government agency has any back door into our LLMs, either, and they can't weaponize your own queries against you (like Google does). [Read more here.](#)

► Many people have been searching for natural cancer remedies and preventative measures for years.

There are numerous alternative cancer treatments available today, which can be extremely helpful in addressing cancer from inside out. Avoiding sugar is important as it feeds cancer cells.

Complimentary, Traditional And Alternative Cancer Therapies

Here is an extensive list of alternative cancer therapies:

▶ 1. Vitamin C

A high concentration of vitamin C has been found to destroy cancer cells while leaving healthy cells unharmed.

Intravenous vitamin C therapy (IVC) offers the best way to deliver a high dose of vitamin C directly into the bloodstream, which is then transported to cancerous areas and destroyed.

Vitamin C therapy for cancer has proven to be completely safe with no side effects.

Read more: [VitaminC](#)

▶ 2. Sodium Bicarbonate (Baking Soda) + Lemon Juice

The alkalizing properties of baking soda have been found to stop cancer growth by raising the body's pH level.

In terms of importance, appropriate bicarbonate levels are just as crucial as hydration, proper breathing (getting enough oxygen) staying warm, maintaining healthy pH (high oxygen status) and optimal nutrition.

What we learn here changes the face of modern oncology because it is now clear, after the most recent research presented below, that bicarbonates should be included in all cancer patients protocols.

Read more: [SodiumBicarbonate](#)

Frozen Lemons

“Place the washed lemon in the freezer. Once frozen, get a grater, and shred the whole lemon (no need to peel it) and sprinkle it on your foods.

On vegetables, salad, ice cream, soup, cereals, noodles, spaghetti sauce, rice, sushi, fish dishes - the list is endless. All the foods will have an unexpected wonderful taste.

Most likely, you only think of lemon juice as vitamin - not anymore. What's the major advantage of using the whole lemon other than preventing waste and adding new taste to your dishes?

Lemon peels contain as much as 5 to 10 times more vitamins than the lemon juice itself and that's what you've been wasting. Lemon peels are health rejuvenators in eradicating toxic elements in the body.

The surprising benefits of lemon is the miraculous ability to kill cancer cells! It is reportedly 10,000 times stronger than chemotherapy.

Why do we not know about that? Because there are laboratories interested in making a synthetic version that will bring them huge profits.

Complimentary, Traditional And Alternative Cancer Therapies

You can now help a friend in need by letting him / her know that lemon juice is beneficial in preventing the disease. Its taste is pleasant and it does not produce the horrific effects of chemotherapy.

How many people will die while this closely guarded secret is kept, so as not to jeopardize the multibillionaires large corporations?

This plant is a remedy against cancers of all types.

It is considered also as an anti-microbial spectrum against bacterial infections and fungi, effective against internal parasites and worms, it regulates blood pressure and an antidepressant, combats stress and nervous disorders.

The source of this information is fascinating: it comes from one of the largest drug manufacturers in the world, says that after more than 20 laboratory tests since 1970, the extracts revealed that it destroys the malignant cells in 12 cancers, including colon, breast, prostate, lung and pancreas.

The compounds of this tree showed 10,000 times better effect than the product Adriamycin, a drug normally used chemotherapeutic in the world, slowing the growth of cancer cells.

And what is even more astonishing: this type of therapy with lemon extract only destroys malignant cancer cells and it does not affect healthy cells.

So, give those lemons a good wash, freeze them and grate them. Your whole body will love you for it.”

Read more: [SodiumBicarbonate+LemonJuice](#)

► 3. Cannabis (Marijuana)

Cannabis has shown to be effective against cancer due to its ability to reduce inflammation. Inflammation is often a result of the immune system's response to an infection or injury.

If you've browsed CBD products online or in stores, you may have noticed that some bottles list "CBDA" or "raw extracts" on the label instead of just "CBD."

But what is *CBDA*, and how is it different from CBD?

CBDA stands for **cannabidiolic acid**, and it's the precursor molecule to CBD (cannabidiol) derived from the cannabis plant.

In the raw hemp plant, CBDA is the most abundant cannabinoid - many people find the raw cannabis plant's lack of CBD surprising, but all cannabinoids first exist in an *acidic form*. We get THC and CBD through the **decarboxylation** of THCa and CBDA.

While most of the research on cannabinoids has been heavily focused on THC and CBD, there is some early evidence to suggest CBDA has its unique advantages, which is why we're seeing a rising trend in minimally processed hemp extracts.

Complimentary, Traditional And Alternative Cancer Therapies

▶ 4. Laetrile

Amygdalin or vitamin B-17 – known in its concentrated and purified form developed especially for cancer therapy by Dr. Krebs Jr. as Laetrile – is selectively toxic to cancer cells without affecting normal, non-cancerous cells.

Read more: [Laetrile](#)

▶ 5. Coffee Enemas

Coffee enemas are a long-standing part of the Gerson Method used to treat cancers.

They have been shown to aid in detoxification of the liver, expel bile juice, reduce abdominal pain, and release toxic matter. They may be an effective portion in the treatment of acute and chronic inflammatory disease.

Read more: [CoffeeEnemas](#)

▶ 6. Ozone Therapy

Ozone therapy is one of the most versatile forms of therapy available today – because it can be applied both through medical treatments as well as via home applications.

It can be administered through the skin, into different body organs including the intestines and lungs, through the ears, in the blood, on teeth and gums, as well as in painful or damaged body parts.

Read more: [OzoneTherapy](#)

▶ 7. Hyperthermia

Hyperthermia [the opposite of Hypothermia] is also beneficial in the treatment of cancer.

In 1893, Dr. William B. Coley discovered how the body's hyperthermic response to bacteria can also help kill cancer cells.

He purposely injected bacterial toxins into the tumors of 10 cancer patients and watched as their bodies responded with fevers, effectively killing the tumors.

Read more: [HyperthermiaTreatment](#)

Complimentary, Traditional And Alternative Cancer Therapies

▶ 8. Hydrogen Peroxide Therapy

H₂O₂ stimulates natural killer (NK) cells, which attack cancer cells as they attempt to spread throughout the body. In the body's immune response, hydrogen peroxide is released by T-cells to destroy invading bacteria, viruses and fungi. Blood platelets release hydrogen peroxide on encountering particulates in blood.

In the large intestine, acidophilus lactobacillus produces H₂O₂ which keeps the ubiquitous candida yeast from multiplying out of control.

When candida spreads out of the intestine, it escapes the natural control system and can gain a foothold in the organs of the body, causing what is called chronic fatigue syndrome.

Read more: [HydrogenPeroxideTherapy](#)

▶ 9. Hyperbaric Oxygen Chamber (HBOT)

We know that oxygen is essential to normal cellular physiology. Cancer cells have an altered metabolism and no longer depend upon oxygen.

In fact, high oxygenated environments are toxic to cancer cells and both slows their growth and triggers cell death mechanisms within them.

Is there a way to increase oxygen in the body to support healthy cell function while being a detriment to cancer cell function?

Read more: [HyperbaricOxygenTherapy](#)

▶ 10. Homeopathy

Today Homeopathy is all but ignored by the western medical model.

Since homeopathic remedies cannot be patented and are inexpensive to purchase, they remain a thorn in the side of pharmaceutical companies.

Homeopathy continues to show significant advancement, especially throughout many modern societies outside of the U.S.

Read more: [Homeopathy](#)

▶ 11. Iscador (Mistletoe Extract)

Iscador, an anthroposophical drug, a preparation made from various kinds of mistletoe growing on apple, pine, fir and oak trees.

Viscum Album was first proposed for the treatment of cancer in 1920 by Rudolf Steiner, founder of the Society for Cancer Research, in Arlesheim, Switzerland and introduced in the treatment of human cancer as early as 1921.

Read more: [IscadorTherapy](#)

Complimentary, Traditional And Alternative Cancer Therapies

▶ 12. Gerson Therapy

Traditionally used to treat and cure cancer, the Gerson Diet, which was developed by Dr. Max Gerson in the 1930s as part of his famous Gerson Therapy, can also help treat and cure a variety of other degenerative diseases, including lupus, heart disease, and many autoimmune disorders.

Read more: [GersonTherapy](#)

▶ 13. Metabolic Therapies

Metabolic therapy is based on the idea that many factors contribute to the occurrence of cancer; a multi-faceted healing approach is used to help eliminate the disorder.

These therapies use detoxification, such as colon cleansing, to flush out toxins; anticancer diets based on whole foods; and vitamins, minerals, and enzymes, which further cleanse the body, repair damaged tissues and stimulate the immune system.

Metabolic Therapy, put simply, is the use of natural food products and vitamins to prevent and treat cancer by building a strong immune system.

The key to stopping cancer growth doesn't lie in traditional treatments like chemotherapy and radiation or surgery, but with an approach that works with the body not against it.

Read more: [MetabolicTherapy](#)

▶ 14. Antineoplaston Treatment

Antineoplastons are a group of naturally-occurring peptides and amino acid derivatives that control tumor growth and have been proven in clinical studies on a number of advanced cancer cases to be highly effective and non-toxic, relative to chemotherapy.

First identified by Dr. Stanislaw Burzynski in human blood in 1967, he observed, *"There were significant differences in the peptide content in the serum of cancer patients as compared with the control group."*

Read more: [AntineoplastonTreatment](#)

▶ 15. Protocol

Protocol is purported to work by blocking the production/energy of ATP in the cancer cells, which in turn lowers the voltage of the cancer cells, causing the cells to eventually break apart.

The process of the cell membranes bursting is called "lysing." The "pieces" of the dead cancer cells are called "lysed material." While the ATP in healthy cells may be lowered a little, it will not harm healthy cells.

Read more: [Protocol](#)

Complimentary, Traditional And Alternative Cancer Therapies

▶ 16. Chelation

Chelation is helpful for cancer patients as it binds with and eliminates excess free radicals, which contribute to the rapid progression of cancer.

How Does it Work? Chelation therapy is a medical treatment that involves the use of chelating agents, which are chemical compounds that can bind to certain metals and minerals in the body and facilitate their elimination through urine.

Read more: [ChelationTherapy](#)

▶ 17. Hormone Therapies

Hormone therapy treats cancer that depends on or uses hormones to grow or spread. It can be used as a primary cancer treatment or to ease symptoms and reduce the size of cancers that are not operable or cannot be cured.

Read more: [HormoneTherapy](#)

▶ 18. Immunotherapies

Immunotherapy is a type of cancer treatment that helps your immune system fight cancer. The immune system helps your body fight infections and other diseases.

It is made up of white blood cells and organs and tissues of the lymph system. Immunotherapy is a type of biological therapy. Biological therapy is a type of treatment that uses substances made from living organisms to treat cancer.

Read more: [Immunotherapy](#)

▶ 19. Bioenergetic Medicine

An upsurge in interest in cancer cell metabolism and bioenergetics in the last decade has greatly increased our understanding of how developing cancer cells adapt to fluctuating changes in their microenvironment by adopting different metabolic strategies.

Read more: [Bioenergetics](#)

▶ 20. Chinese Medicine

Traditional Chinese medicine (TCM), with its holistic approach to healing, has long been integrated into cancer care alongside conventional treatments such as chemotherapy, surgery, and radiation therapy.

Moreover, China has made notable strides in the field of precision medicine, leveraging genomic profiling and molecular diagnostics to tailor treatment strategies to individual patients.

Read more: [TraditionalChineseMedicine](#)

Complimentary, Traditional And Alternative Cancer Therapies

▶ 21. Ayurveda and Siddha Medicine

A quick look through the National Institutes of Health research database reveals studies investigating the most common Ayurvedic herbs. They tell the tale. To date there have been close to 500 studies conducted on cumin, 650 on fennel, and 2,500 on ginger.

Interestingly, there have been just under 10,000 research studies done on turmeric and curcumin – including 3,500 studies on how turmeric alone, as well as in combination with other herbs, can help fight cancer.

Most health-conscious individuals are aware of the healing power of these Ayurvedic spices and may even be aware of some of the other principles around Ayurveda.

However, few grasp how these individual modalities are part of a cohesive and complex system of medicine that has been in existence for over 5,000 years.

Read more: [AyurvedicTreatment](#)

▶ 22. Chlorine Dioxide

The first reason that chlorine dioxide should routinely be used in every cancer patient's protocol is that chlorine dioxide targets cancer cells like a magnet because of the lactic acid at the cancer site.

Once chlorine dioxide comes into contact with lactic acid, it releases oxygen directly where it is most needed. Cancer cells produce excessive amounts of lactic acid because cancer cells have dysfunctional mitochondria, which prevents their use of the citric acid [Krebs] cycle.

Read more: [ChlorineDioxide](#)

▶ 23. Bio-Resonance Feedback Therapy

BRT technology optimizes the Human immune system to its maximum operational level, in order to deal with any diseases of the body, including mental / psychotic.

In short, this technology will heal anything that the Human immune system can resolve itself – when it is working unhindered and at its greatest possible capacity.

The immune system protects the body against disease or other potentially damaging foreign bodies.

When functioning properly, the immune system identifies and attacks a variety of threats, including viruses, bacteria and parasites, while distinguishing them from the body's own healthy tissue.

The Human body can heal itself of any disease – however because of factors such as environmental toxins most people's immune systems are compromised, which leads to disease.

When used regularly, this technology maintains the body's immune system at such a high level that any and all detrimental intrusions (chemicals, toxins, pollutants, and other stressors) will be repelled, and the body will be cleared and cleansed by way of its own natural processes.
