

Client #3

Client #3 has been in a medical career for the past 43 years, a job that requires her to be on her feet and moving fast on a regular basis. She told me that she had frequent and severe leg cramps and that she hadn't been able to urinate normally for the past 3 weeks. So, she had committed to having three sessions in a row in hopes it would help her. The morning after the first session she was very excited because she was finally able to urinate normally and also said her legs felt good and she didn't have any leg cramps or discomfort during the night. She had two more sessions and felt more energy after both sessions. She was very happy with the results of her three healing computer sessions.

It has been 10 weeks since her 3 sessions and this is a text message I received from her three days ago.

"Hi and Happy New Year, hope you are doing well and are having a great start of the year. Just thought I'd say hello and wanted to share with you I have not had any leg cramps since I saw you. I have been in awe and my legs are very happy. However, a little sensation up & down my legs, but cramps the way I used to, no more. And my bladder is good still. Thank you so very much for the amazing changes 😊. I would love to visit again, if that's ok? My husband would also like to have a session as well. Thanks so much and I look forward to seeing you."
