

## **Client #5**

Client #5 is 24 years old and was having a bout of depression. He decided to move back to California to be with his family from Chicago and to get treatment for his depression. I told him about the healing computer and he said he wanted to try it. The day after his first session he said he felt better so he wanted to have another session. On the third day I offered him an 3<sup>rd</sup> session via text but didn't hear from him. A couple of days later I found out he had returned to Chicago to resume his job and life. I'm very happy I got to give him 2 sessions and do believe it helped him based on the fact that he went back to Chicago to resume his job and life there so soon after he left it.
